Business Tips Corner

1. Claim Your Google Business Profile

Make it easy for new clients to find you! A complete, verified Google profile helps improve search visibility and adds credibility.

2. Use Social Media Strategically

Focus on one or two platforms where your audience is active. Share value-packed content, behind-the-scenes moments, or quick health tips to build trust and stay top-of-mind.

3. Automate Appointment Reminders

Use your EMR or scheduling system to send reminders. It reduces no-shows and keeps your day running smoothly.

4. Build a Referral Network

Connect with nearby providers (including fellow MedFlex members!) to refer clients across services. It builds community and client trust.

5. Refresh Your Intake Forms

Keep them simple, mobile-friendly, and HIPAA-compliant. Updated forms improve the client experience and help you collect the info you really need.

6. Brand Your Space

Add small personal touches to your office—like signage, brochures, or business cards. It makes a lasting impression and reinforces your brand identity.

7. Offer a Limited-Time Service Promo

Seasonal or limited-time offers (e.g., summer wellness packages) can encourage new bookings and introduce clients to underutilized services.
